**Designed for now,
built for later.**

More than 30% of the world's waste is the result of building, construction, renovation and demolition.

XFrame is a radical response to this global waste challenge.

XFrame strives to achieve a complete circular ecosystem from renewable resource harvesting through to install, use and end-of-life recovery.

Each XFrame component is engineered for deconstruction and reuse in accordance with circular design specifications.

A kit of standard parts.

Made from natural and quickly renewable materials.

Requires only standard hand tools.

Engineered, geometrically stable and scalable.

End-of-life flexibility via vertical modularity.

Eco-system design for effective circularity.

Standardised parts.

Modular panels.

Adaptable spaces.

Room-in-Room

The XFrame Room-in-Room range is an industry leading circular privacy solution for retail, office, education and healthcare.

We offer locally manufactured, low carbon, design focused spaces with some of the shortest lead-times on the market.

XFrame spaces are uniquely capable of being fully integrated into an architectural specification. Leveraging XFrame's supply chain linings, glazing, lighting, and furniture can be customised to match a wider fitout's styling. Such freedom allows customers to achieve a cohesive look and feel across their property portfolios.

Products

Mini Booth

XFrame Mini Booth

The Mini is a single-person, acoustically controlled space designed for video calling in open offices. It is efficiently designed to fit within the superstructure of the office space, utilising previously underutilized floor space.

Compact Footprint

The compact footprint of the Mini allows it to seamlessly integrate into busy office spaces.

Easy Handling

The Mini can come in parts or pre-assembled into panels. Both panels and parts fit easily in a small elevator.

Classic Booth

XFrame Classic Booth

The XFrame Booth offers a larger internal volume (20% larger) and a work surface twice the size of similar market solutions, maximizing productivity during video calls or when you need a break from your desk.

Comfort

The Booth has a larger internal space which enhances comfort for long term use, calls, meetings and productivity.

Expandable

Easily adapt a single booth into a double or triple person meeting space, making use of the same standard framing parts.

Carbon Calculation

About this data:

XFrame calculates project carbon costs using volumetric data from an as-fabricated 3D digital model. Components are categorised by their respective material type and volumes summed for carbon calculation using localised EPD (environmental product declaration) data. When exact EPD data is unavailable XFrame uses the next regionally appropriate EPD information and applies an additional variance factor for this data source.

Carbon emissions reported refer to (BS) EN 15804 lifecycle stages A1-A3 only. Carbon emissions reported include both biogenic carbon (GWPB [kg CO₂-eq.]) and fossil carbon (GWFP [kg CO₂-eq.]) data sources.

For further information pertaining to lifecycle stages A4-C4 contact XFrame.

Rooms

ANZ Breathe

XFrame has been engaged to deliver retail store fitouts for Australia and New Zealand Banking Group (ANZ).

ANZ is one of Australia's largest banks with more than 700 branches across the South Pacific. XFrame has provided ANZ with a complete modular store fitout solution. Modular wall framing panels with recycled PET bottle insulation, modular electrical solutions and FSC certified Tasmanian Oak Veneer linings form meeting, kitchen and customer facing spaces.

Project specifications

XFrame allows ANZ to fulfill its vision of a branch that can be easily reconfigured as needs change over time while taking advantage of carbon sequestering materials and local manufacturing. As part of the ANZ fitout contract XFrame also manufactures and supplies bespoke planter boxes and workstations that are designed in alignment with circular ideals.

Rooms

ANZ Pirie St

Powered by XFrame

Rooms

ANZ Pirie St

24 rooms and over 720m² of demountable, low-carbon and reconfigurable spaces for ANZ's new head office in Adelaide.

The XFrame system used at 83 Pirie Street unlocked efficiency, design versatility, and a sense of permanence – all while making possible end-of-life recovery. Spaces were nested together using the tartan grid planning scheme – sharing walls and intersecting services – resulting in highly efficient material utilisation and much improved assembly times.

Meridian Energy

Powered by XFrame

Rooms

Meridian Energy

Working alongside Unispace, XFrame assisted in the design, off-site fabrication and installation of five high performance room-in-room demountable meeting spaces in the central floor plate of the Meridian Energy's new head office.

The project presented a series of unique construction challenges that were highly suited to use of the XFrame system. To limit impact on the Category 1 Heritage Listed Building new spaces were required to be completely free-standing – discounted from the base-building and easily removable. XFrame's self-braced and demountable design ensured this mandate was achieved.

Project specifications

The spaces were required to meet the standards of the Living Building Challenge (LBC). The challenge aims to create buildings that are not just less harmful, but truly regenerative. LBC includes consideration of water, energy, health, equity, happiness and beauty. Stringent material specification, effective waste management and a transparent local supply chain were two critical aspects XFrame helped to fulfill.

	71 Modular Wall/Window/Door Panels across 6x Standard Skews.		Integrated 600mm radius curved wall panels with pre-applied curved linings.
	15 Modular Roof Panels.		1200mm x 2700mm demountable wall panel with 2380mm x 1080mm door opening.
	160m ² of prefabricated demountable external timber finishes.		200mm x 2700mm demountable wall panel with 2200mm x 1080mm window opening.
	230m ² of prefabricated demountable internal PET finishes.		STC rated wall build-up (12+4+92+12+12).
	230 sheets of structural plywood used in production of the modular panels.		
	2700mm high demountable wall panels with false ceilings at 2400mm from finished floor level.

Booster

Powered by XFrame

Rooms

Booster

Working alongside the clients long-standing architect, XFrame manufactured and supplied four adjoined large video conferencing spaces.

These spaces were each 1.8m square internally, allowing for two people to comfortably share the space (for training and joint calls).

The XFrame panels were installed after-hours to minimise disruption to the live office space. Over the period of 3 weekends the XFrame spaces were erected, insulated, lined, and commissioned (including tie into base building services).

The resulting spaces are popular private video and phone calling rooms that allow Booster to meet shifting client needs.

Project specifications

- × Elegant design integration through colour and texture match of linings and glazing to existing fitouts detailing.
- × Cost effective and space efficient offering joining meeting spaces together with shared walls.
- × Free-standing installation with false ceiling system and parapet wall to minimise disruption to live office space.
- × Fully base-build integrated services provide high performance cooling of rooms and fully fire-compliant spaces.

Product Warranty

Introduction

XFrame is committed to providing high-quality products and ensuring customer satisfaction. This warranty outlines the terms and conditions under which XFrame products are warranted against defects in materials and workmanship.

Warranty Scope

Modular Walls, Pods, Booths, and Meeting Rooms.

Period of Warranty

5 Years.

Coverage of Warranty

XFrame warrants its products are free from defects in materials and workmanship for a period of 5 years from the date of delivery.

During the applicable warranty period, XFrame will repair or replace (at its discretion) any product, part, or component covered by this warranty which fails under normal use as a result of a defect in material or workmanship with a comparable product (at its discretion).
